

DEVELOPMENT AND IMPLEMENTATION OF A STRATEGY FOR HEALTH CARE SYSTEM REFORMS

Azimova Maftuna Muhammadaminovna

Qo'qon Universiteti o'qituvchisi

Annotatsiya: *In this article, and then get in the period of independence in the years aimed at reforms to strengthen health care in the republic had takenhi and its current performance will be carried on the work of the word.*

Keywords: *demographic, environmental, emergency care, health care, epidemic, medical and sanitary, quarantine, material and technical base, market economy*

From the early days of independence in uzbekistan have been undertaken in the way of the formation of a democratic state. In the years of independence political, economic and cultural spheres in the comprehensive reforms carried out among selected measures related to the political and legal framework of a route to the creation of individual units'kidlab it should be. An independent and democratic state and civil society of uzbekistan to establish a market economy transition to act in a consistent way as subjects of international law and the world community to join.

During the years of independence, the country's political, economic and cultural life in all aspects was the start of the recovery period. Also step methodology to a new level in the medical field'year. In particular, the healthy'events aimed at liqni embarked on a radically improved storage system. August 31, 1991 in O'extraordinary XII convocation of the supreme council of the republic of uzbekistan at the sixth session, in addition to O'time independence and the release of the sovereign state-O'established the republic of uzbekistan of uzbekistan,solemnly that he was able to e'at the same time, neighboring countries being so'ng before this problem in our state normative legal acts of the base of the toe to create the first'did it.

O'land in time for independencesince ishilgandan the world ilg', or mand o amlakatlari from experience'time o'a worthy specific historical-mmuslims further under national traditions, an'from anaga, demographic, environmental situation, socio-economic conditions atbee proceeding from the healthy'liqni keeping the new system and its management are being developed and implemented new methods are being. Development and implementation of a strategy for health care system reforms

Other universal declaration of human rights that he is faithful to the republic of uzbekistan the norms of international law and the internal law of the country from the rule of the column that stand e'ti of was that. This declaration of 25 of substance, every man o'ta zi and the health and wellbeing of the family'toe minlash necessary to'have a right to present use, it was noted that the medical service⁶. In the universal declaration

⁶ Хаитбаев М., Исаков Т. Инсон ҳуқуқлари умумжаҳон декларациясида тиббий хизмат масала Ўзбекистонда соғлиқни сақлаш. Здравоохранение Узбекистана, 2009 йил 9 январь.

of human rights o'man has the right to use the help of qualified medical expression z who find the fact that O'the constitution of the republic of uzbekistan o'z found expression.

In particular, chapter ix article 40 of the basic law, "everyone has the right to use the services of a qualified medical" and in this regard have been a sign that the population, strengthening the rights of the methodology of year.

Also, the fact that the family is the backbone of society, human health ko'p garden in a family environment, in respects to'liq by the taking of the basic law in this regard to the relevant norms are also included. In particular, chapter xiv of the constitution of the "family" called using 63 in his article "the family is the basic toe of society'g'is accounted for in the protection of the state and society and toe'lish entitled" outline the methodology'was the year.

Article 65 of the basic law, while in "motherhood and childhood shall be protected by the state," says ta'kidlab was⁷. The legal basis of the reforms carried out in the system of these compounds was established.

In the republic the og'ir ecological environment, given the hole in 1992 year 3 of the state sanitary control in July'g'rising the law was adopted. Sanitary-epidemiological control of the main principles has been defined. In particular, to create a favorable environment for health, radiation safety units'control over minlash o'rnatish, organizations, and individuals by enhancing measures will strengthen legally the responsibility for the violation of sanitary rules. This is the law in the sanitary-epidemiological issues in the drafting of international agreements with foreign countries, options are also provided⁸. In this regard the situation in the republic that has been done on the ecological measures to improve the position of the event. In particular, most of the soviet period, social disadvantages of sad in a way one population to the delivery of clean drinking water for special masla e'tibor focused on.

Safely'in the field of storage liqni reforms was phased out. 1991-1998 of the year o'z toe conventionally into two parts covering the preparatory stage'can lish. The first stage is "Horizontal" reforms that set the stage 1991-1994 by the funds allocated in the budget'real world'liqni within the current structure of the storage system is re-distributed and has been the fund's o'rin to distinguish from the old system based depending on the number of the shape of the head influences can manage the budget, unlikerise to o'to o rga stationary'rin reduced the fund⁹.

O'the healthy of uzbekistan the republic of uzbekistan'on 30-31 may 1994 on the initiative of the ministry of storage liqni Andijan medical staff conference in the region of the toe'become market relations in which the o'teeth, one of the most pressing problems of the period of "medical services to the rural population of ko'rsat quality and the level of culture, the effect is to increase further the issue of" ko'sits out and

discussed¹⁰. In particular, the fishermen of the region andijan, Izboskan, the golden'l and Bulakbashi district QVP re s ta'ta mirlandi with having the equipment to the necessary conditions for the population'will minlash¹¹.

In the republic for the years 1994-1998 healthy'liqni can be called the start of the period of reconstruction in store. In particular, the healthy'management has established a system liqni three tier storage system. In particular, in the first stage sog'liqni development strategy the development of the state of the function to keep most of the high authorities O'the president of the republic of uzbekistan, the president and the powers of the cabinet of ministers postponed¹².

The population rose to a new level of quality medicine and medical service system has been improved. Particularly, on the development of important measures were the health care system. Yo'naldi thiswork as an important step in 1996 to 26 years in August "on the health of the citizens of uzbekistan"on a special law was adopted. This law is the main issue at the state level, three were identified on the legal basis of:

- The guarantee of the health rights of citizens by the state;
- And to promote the formation of healthy lifestyle;
- Activities in the field of state and public organizations from the consolidation of the legal aspects of health¹³.

This law is the adoption of a radical renewal of the health care system to create the ground and trigger systemic reforms aims to improve the health of the population. This process will increase the quality of medical services, preventive measures and effective to increase the health of the population e'tcaused the phrase to intensify. We have that you analyze the law as one of the next major social reforms to the prosperity of independence from the population served. If you encounter serious problems in the health care system in the colonial period, after independence, the state of this field e'tibor, and created the conditions necessary for its development. Thus, in 1996 , adopted in the field of health law reforms serve as a solid foundation for long years.

"Health care about the" citizens the law of health preservation for the basic rules are defined. This consists of the following rules: 1) observance of human rights in the field of health 2) to take medical care to enjoy from all layers of the population; 3) can maintain the rule of preventive measures; 4)the health of the citizens to be protected from the social aspects of lost; 5) medical sciencessing atunit aliyor. "The law," O'of the republic of uzbekistan the Health and powers to maintain the structure of the ministry yesm was set. In addition, "the law" in terms of high population xavotirsizligini ta'mput in to determine. "The law"bem eachor one's health, rights and privileges in the field is also shown to maintain¹⁴. The new legislation adopted in the healthy'liqni observance

of human rights in the field of storage, from medical care to enjoy all layers of the population toe'la, take the rule of preventive measures and healthy'spotted either'social protection of citizens safely in case of hardening issues such as citizens'lig'e as one of the basic principles of keeping the nest'ti of was.

1996 26 years in August O'the healthy citizens of the republic of uzbekistan'lig'nest protection'g'rising" special state adopted the law. This law is important for the state to toe'present the three main issues were identified:

1) citizens of the healthy'lig'nest by guaranteeing protection of the rights relating to the state;

2) safely'lima lifestyle formation;

3) in the country all the healthy state and public organizations'activities in the field of the legal aspects of storage liqni edit.

Safely'liqni storage in the law on citizens ' healthy'lig'nest protection, established the basic principles of. They consist of the following:

1) the healthy'liqni observance of human rights in the field of storage;

2) the population of all layers to provide access to medical care;

3) preventive measures, the rule;

4) the healthy'lig'from ida isolated the methodology of social citizens'llab support;

5) medical science and practice of the competition.

Law O'time of the republic of uzbekistan the healthy'liqni organizational structure of the ministry of storage and also powers has been identified. In addition, the act of the population, the sanitary-epidemiological safety aspects ta'also minlash o'z includes. The law in the health of every patient'in the field of storage liqni rights and benefits was also noted. This was done to reform the system on the basis of law. The head of state about this special resolution. According to this decision the healthy'in the operating system, storage liqni professionals, scientists, lawyers, and organizations relevant to this work O'the republic of uzbekistan uzbekistan healthy'liqni develop the system update program storage. This program safely republic'council and the ministry of storage liqni O'the cabinet of ministers of the republic of uzbekistan in ko'sits out, the healthy'liqni of the update of the storage system as the main program so had recommended'ng, 1998 10 of the year on November with the decision of the head of state approved. In the program the healthy'liqni storage system reform kontsepsiyasi the following is offered: free medical service ko'which rsat and toe should be funded from the state budget'present treatment-preventive institutions of the recent'yxati drawing, the point of the network, a village doctor,'the development accounted for, the doctor and highly qualified personnel o'the preparation of the central medical staff, medical college of education to convert the same purpose implied.

In the program the system to the high level of ambulance ko'many medical institutions in order to comb (Tashkent city ambulance station in the republic and

sanitary aviation Tashkent region) on the basis of the establishment of the emergency medical assistance center and its regional branches implied. According to the decision, higher medical o'o educational institutions, the presence of three years'duration of the winter with highly qualified nurses (reanimatologlar, tug'ruqxona obstetrician) prepare toe'linmalarini planned to establish. The resolution, international organizations, foreign investors, jamg'of arma and the funds of the organization's also the real'storage system to attract liqni ko'zda implied. This decision to carry out toe'citizens in 1999, 14 years in January O'the cabinet of ministers of the republic of uzbekistan of time, "O'of the republic of uzbekistan the republic of uzbekistan healthy'liqni storage of the ministry and its territorial organization of the main objectives to'g'rising" you decide¹⁵. O'the cabinet of ministers of the republic of uzbekistan the uzbekistan healthy'liqni the central administration of the ministry of storage and management systems of its approval. Mainly the leadership of the ministry, the minister and his to'network o students'from toe to rinbosari'ldi. The city of tashkent healthy'storage liqni the head of the department o'z post ko'ra 'safely'ministry of storage liqni o'has been identified as rinbosari.

O'the cabinet of ministers of the republic of uzbekistan republic of uzbekistan o'his zini 14, 1999 as the application to the decision in January of ' O'of the republic of uzbekistan the republic of uzbekistan healthy'liqni about the ministry of storage"on the regulation has been adopted¹⁶. The real'ministry of Storage liqni status, tasks, powers and organizational activities of the principles has been defined. The units in the document'kidlanishicha the healthy'ministry of Storage liqni o'z o work'time of the constitution of the republic of uzbekistan, the supreme decisions, decrees and other regulations is conducted in accordance with the president.

O'the cabinet of ministers of uzbekistan in 1996 of the republic of uzbekistan "toe until the year 2000'in the present period O'time to the program of development of rural social infrastructure of the republic of uzbekistan'g'rising"the decision on the¹⁷ real'liqni storage system implemented in cardinal o'zgarib start to rise to serve. Her ko'ra, the main primary medical sanitary assistance either'were given a set of nalish and compact and equipped with the modern equipment on this basis, rural health clinics (QVP) and (city) district medical associations consists of a two-stage system to o'built in the us.

The difference from the old system o'laroq, the creation of the new system less effective as a result of excessive toe in the area'g'was given to eradicate holes. This o'z for the convenience of the common people in turn tug'dirdi. In particular, equipped with modern equipment, rural health clinics in the population o'zi necessary to toe'therapies able to get the toe of the present'ldi. Simple to apply either the district or the city previously therapies for medical institutions to to'g'settings come was a good

opportunity for this population. Identify each patient's condition and treatment using modern equipment at the same time measures accordingly ko'rilgan or a district (city) medical institutions to either'llan be given either by the procedure'present methodology'was the year.

As a result, the soviet system from the colonial contrast o'laroq law, within the framework of the modern medical care of the population of the right of use of the recent'such as native to was removed. In particular, at the present law principles established in 1998 arni for the implementation of the 10-year in November, "O'of the republic of uzbekistan the republic of uzbekistan healthy'liqni storage to reform the system to the state programme'g'rising" O'e the president of the republic of uzbekistan'same time, neighboring countries were¹⁸. In the system on the basis of this decree "on the stage of structural reforms" (1998 -2002 years) that contains the name of the second stage of the reform was carried out¹⁹. The main purpose of the reforms has been identified at this stage. Also, "1998-2005-years ' healthy'sstorage liqni the concept of reforming the system" was adopted and the real'liqni the complexity of the storage system reform goals and objectives were identified.

Reforms carried out in the field of improvement of activities in the area of the republic Farg'mother is also in the valley o'z began to give results. In particular, the region namangan outpatientya-polyclinic institutions 1998 account of the toe of the year'26 the citizens the city of namangan, Chust district 24, 23 district Pop, Yangiqo'rg'district units in 21, Uychi district 18 ta,dance'rg'district 18 units, Chartak district 17, district 17 Kasansay, Namangan district 17, Norin 16 units Uchqo'rg'on district 15, Mingbulak district by organizing toe than 12'lsa, 2001 come to 27 units in the city of namangan, Chust district 27 units, 25 units of district pop, Yangiqo'rg'on 22 units in the district to'dance'rg'district has 21 units, 21 units of district kasansay, namangan district 20, 19 Uychi district, Naryn district 19, Uchqo'rg'on district 17, 18 units chartak district, Mingbulak district 13're taga ko'ko payganligini'ramiz ²⁰.

The first governor of Namangan region of the republic is the president of the implementation of reforms in the medical field either'lida do a great job. In the region, many of the 350 seats in the foundation of the central hospital of the band center is a branch of the organization of emergency medical aid.

For this purpose to the hospital to re-ta'mirlash 400 billion more than the sum of funds have been spent. The medical center with modern equipment units'in finland for his minlash "med medical Instrumentarium" corpsand the German oratsiyasi "Dentomed" firms with 5,5 million usdin the amount of settings agreed. It was launched shbu a large part of the equipment were to come²¹.

Also viloyo the governor O.O Jobborov of the republic of uzbekistan and the president of the tinig 1998, November 10 in "Real'liqni storage to reform the system to the state programme'g'rising" on UP-2107-the fulfillment of the decree dated ta'minlash the governor of the region, and in November 1998 30 ing 298-q according to the region oro ko'tape p "Go'hall" state scientific center of emergency medical care on the basis of the regional hospital in connection with the organization he the governor of the province'liqto save the department of ng December 29, 2000 highly qualified medical service to the population and considering 01-1382 letter dated ko'rsat and further to improve the amenities maq1 ko in a sad city of the region, the level of activity at p a field hospital ko'ko rsat which'p network hospitals to convert to'g'rising the decision theildi²².

Execution units in the region qororni'organize minlash was on a tour of the practical work.

Above the program of reformsthat tla's doing execution Farg'mother of the valley in the region, andijan out did not go. regional hospital for medical equipment, including 250 units, anesthesia machines and means neyroxirurgik was delivered. Including 2to 5 tib oxygen apparatus 10 billion soums and other importantequipment units biy'minlash will. Also, 14,2 45 billion soums construction of new medical institutions and units'mirlanishi planned. 2000 of the year, according to the position on December 9, 24,8 billion soums in the amount of the purchase of drugs and medical equipment made²³. The numbers Farg'safely in the valley, mother,'save the current execution state of the program liqni enough ta'ko minlash that had'rsat is.

Come to the objectives noted above toe, 2007'citizens on the basis of the activities carried out in the system and analysis of the situation in 1998, he received'liqni storage system to reform the state program and witnessed the successful implementation of the most important rules of the target task can be recorded. Because 1998, the year of years of work carried out within the framework of the state program in o'tib o'zini was beginning to give his results.

Safely'liqni storage area is the most important toe'toe did it'g'emergency medical help from one of imlar ko'rsat to the service also exactly how to get out of the new stage of the 1998 10-November signed up in "reforming the health system qilish the state program" a decree, in particular, bring into being a holistic system of emergency medical care services and medical equipment, which meets high world standards, equipped with the motor to this area, units with highly qualified doctors and medical staff average'put forward the task of minlash²⁴.

Service of emergency medical care and ambulance services in the year 2000 as a result of strengthened the legal basis in the republic of emergency medical care services of a holistic system came into being. This is available in the district and the city "03" type "quick help" service, medical assistance to the population and aviation

emergency medical provider to include all of the teams to a major medical body system improvement. In particular, Farg'mother in the valley shoshilinch service system, the most modern medical care, the medical equipment is equipped with high international standards in the diagnosis and treatment. Training of field staff, technical and other staff work hard work of stimulating settings are also consistent either'present methodology'was the year²⁵.

Ko emergency medical care to the population in the republic'sat organizational framework to strengthen the "emergency medical care services in the support and development of this tirish fund regulation"²⁶ was also important.

The republic was in a state of health protection, the quality of medical services in the area of measures to increase steadily events continue to go. In particular, the 2003 year 26 February, in one of the president of Uzbekistan republic of Uzbekistan "the healthy'liqni measures to further reform of the storage system'g'rising" execution of a decree of the units'minlash the period of the third stage of the reforms, ya'see "stage the deepening of structural reforms" (years 2003-2007) can be called²⁷.

The toe joint of the execution of the decree of the head of state'Farg citizens'mother in the valley of the population in its health protection on the positive results achieved. In particular Farg'mother in the region, the year the number of medical units have been commissioned in March 2003 in the district. In particular Rishtan, Vodil, Uchki'18-20 km in the long term for the population qvp district central hospital we pride ourselves in the world, with modern equipment and construction services to the population of ko'rsat began²⁸.

M of ministers of the republic of Uzbekistan ahkamasining on January 25, 2005, dated the 30 "Sthe year of the health of ihg" davlat on the program to the decree²⁹ ko'ra "sound health" year of the program, the main directions of the number of share masla were identified. Farg on the execution of the state program'mother of the positive achievements in the region. In particular, all cities of the region and created new units and districts of the center with medical equipment subfiliarlari'minlash and will attract qualified personnel. Viloyo emergency medical care to the population of the provision in regard neither the students 743 467 doctor and nurse of the activity far. 52 percent of the doctor, the nurse while 64 footprint was delivered to higher level categories³⁰.

Medical services ko'rsat of quality and effectiveness, mainly, the medical staff experience the garden'liq. For this reason, the country is highly qualified, knowledgeable doctors to prepare a separate e'tibor atldi. Independence in the years of higher medical units'education in the field of also serious and a positive o'zgarib review listed in'y gave. Medicine of the high o'back our country from foreign ilg'or

units'education is the center of the to'g'from rida-to'g'settings relations o'rnatish, the experience share is an opportunity to have toe'ldi. O'of the republic of uzbekistan's first Presidenti the initiative of i. a. karimov abroad students, scientific researchers and graduate students will be sent either'present methodology'was the year. As a result, higher ta'education in ourselves o'a significant rise in the educational process. The field of medicine in the units'place near to the quality of education the international level were reached.

"The health of citizens law"on the entry into force in the country since 1996, with the health department and owned large changes have been implemented to maintain all medical institutions³¹. Procedures increased interest in the implementation of international standards. Doctors, nurses , and staff are all knowledgeable, experienced and iste'specialists at the expense of the dod is enhanced. Regional, city and district hospitals of doctors at leading foreign experience exchanged. They learned the methods of treatment with the help of modern medical technology. Uzbekistan in 2000 years, the medical units'continuous education and started giving great importance to improving the skills of specialists The activities of the tashkent institute doctors in training , showingher the various links of 43 department and designed coursesevery year, ida 8-10 thousand doctors have expanded their skills³². Doctor 900 students in 1998, and increased the professionalism of the medical staff of 3 thousand secondary. The level of the category among doctors by 36%, while the medical staff secondary index by 24% increased. Therapeutic 200 to the number of doctors have increased³³. Students qualified doctors in rural health clinics in the region 102 and 800 secondary students of a medical professional³⁴ was working on. In cooperation with international organizations, sponsored by the world bank at the united states ASSOCIATES INS" with the company according to the contract, in the region Fergana Health "-1" program is being implemented. Medical institutions of this program material-technical base of strengthening, training of personnel and the level of international standards for the treatment to bring out to serve. Besharik, the kuva and effective in the work kuva district was launched. Women of childbearing age within the framework of the program, mothers and children's health, e'tibor is enhanced. Women health units'delivery for the birth of the child and healthy minlash interval of at least 2-3 years to extend the measures considered. Among women planning to birth, the fetus to keep from and comfortable on the use of modern tools on prevention was established in meetings and conversations³⁵.

Of the population with the necessary medicines ta'o minlash also important the issue of'zgarib review was carried out. Private entrepreneurship widely in this regard either'l opened. Toe drugstore owners available in the country so as a result'of drugs

from the pharmaceutical company I foreign toe lmas able to bring'the ldi. 1997 25 years in April, "drugs and the pharmaceutical activity'g'on"rising O'the time of the law of the republic of uzbekistan was adopted. This law was the population with the tools of the drug in ta'minlash in the field of state guarantees and state with the bodies of medicines ta'competence in the field of minlash were identified. As a result of the reforms carried out within the framework of the law in the country has accelerated the development of the pharmaceutical industry. In particular, in the territory of the republic for more than 160 new built from the necessary in the population toe pharmaceutical companies'present 2 of pharmaceutical products,used in more than 300 kinds of be out³⁶ while this is o'the turn safely z'liqni put forward the concept of the quality of the storage area ko'to achieve rsatkich sped up the process.

However, in this area in the initial years and some offense to either'l methodology'of the year, cases were also observed. Among them are illegal either'also, I am going to increase the wealth with those who mukkadani arms are started. For example, some fake the pharmacist in the production of drugs began. How harmful is of such activities is obvious. For this reason O'time ministers of the republic of uzbekistan, the cabinet in 1999, 14 years in January, "by means of medicines and medical products in the purchase ofhn to the regulation of'g'rising"³⁷ special resolution. This decision, in accordance with the network retail pharmacy means of medicines and medical products, the quality and price of major single of the character of the system was introduced. Safely'liqni storage organization under the ministry of special inspection and control him by means of medicines and medical products, control over the sale and purchase of ta'was assigned the task of minlash.

The activities of private pharmacies more negative side emerged. Private any drug without the prescription of drugs (ko doctor'without rsatma) to buy the toe to get the appearance of'ldi. As a result, o people'without knowing zlar o'o zlar'zlar had tried to cure. This lead to negative consequences. For example, the patient noto'g'settings' methodology'llab the healthy'aymasligi of the disease to the chronic form o'teeth were observed in condition or poisoning. Therefore, the decision in means of medicines and medical products compared to pharmacy staff who committed abuses in the sale of ma'muriy and criminal responsibility is enhanced.

In the republic the healthy'liqni storage to reform the system and its improvement measures necessary for the implementation of the toe'did it means'of ministers for the purpose of delivery to the Participation of 1997 wedges the year 2 in December and "Treatment-preventive institutions of the funds' for the improvement of the system supported by'g'rising,"³⁸ he decided. The decision taken by the government had allocated funds'in addition to various charitable societies from foreign investments, and also the capital of the use of commercial institutions ko'zda implied. The spending for the treatment of toe'ladi means of'o's a part of patients'zimmalariga z

loading also was taken into account. For example, in 1998, the year 1 January to extend the period of treatment in the patients from the hospital, we nutrition was paid. Besides, the healthy'liqni storage system on the methodology of shimcha funds' units'minlash ko'zda keep different non-jamg'also arma ta'sis was. As a result of this event safely in the republic'work to keep liqni reform and the improvement it either'lida has achieved some positive results.

Achieved success and implemented o'zgarib eliminate the effects of all the problems in the review area, imadi. In particular, 2007, the healthy'save liqni and the first region of the system for the protection of human health and the regional toe'g'ko, and the holes of preventive medical services'quality by increasing the level of the garden to the rsat'liq ko'issues pgina o'z will find a solution. Also, from - treatment institutions share ko'pchilik health organization'to keep the organizational structure of management liqni be'naq such and effective remained. Safely'by the bodies over to the regional storage management liqni the activities of medical institutions'liq organizational-methodical guidance ta'minlanmadi³⁹.

The toe of the territory of the republic'diseases of the citizens o'z at the time of detection, prevention and effective treatment of g'verse is important as a diagnostic tool network services'stagnant I was incredibly organized. Also, screening centers (the tug of the baby'tug ma with defects'that twisted in order to avoid either'present methodology'of the year, which carried out the verification work center) of the network wide'despite the fact that I had created, toe'lajak the health of the mother', stained and calving pregnant, the condition of the control system, especially in rural areas, in terms of quality, improve units toearn it.

"The further development of structural reforms" that taking the stage name (years 2007-2011) to the development of r'tinchi management system in the staging area and on the basis of its legal basis of modern requirements against takomillashtirildi.

In particular, the healthy'liqni more storage in order to enhance the 2007 19 year in September O'time, the president of the republic of uzbekistan healthy'liqni storage system to reform "the healthy'liqni further enhancement and development it either main storage system'of the state program of development and the implementation of measures to nalish'g'rising"on UP-3923-decree number e'at the same time, neighboring countries were⁴⁰. This decree to the same period in yig up'coming mechanisms to solve the problems of twisted o'z reflected in found. In the meantime, on the basis of this decree, O'time, the president of the republic of uzbekistan PP-700-the number of "measures to improve the organization of the activities of medical institutions of the republic'g'rising"the decision on e'at the same time, the neighboring countries. This single decision on the basis of the organizational-methodical guidance

⁴⁰ Миразимов Д.Б. Ўзбекистон соғлиқни сақлаш тизимини ислоҳ қилиш: асосий йўналишлар ва босқичлар // Соғлиқни сақлашни ташкил этиш ва бошқариш, 2010. 3-4 сон. - Б.24.

and populations ko'rsat control over the quality of medical services used ta'healthy minlash who'liqni storage structure has formed⁴¹.

In the meantime, 2011 of medical services to the population of ko'to the quality of rsat, especially in the areas, district and regional medical associations of material-technical base of the condition o'the modern requirements of sib answer's still growing ma'lum toe'ldi. Improvement of the management system of the republic of specialized medical center in the medical center leading foreign experience of organization of work and the rag'ilg batlantirish of methodology or form in the practice of'llab and others of the period was to have become in demand.

Therefore, the healthy'liqni deepening of the reform of the storage system to increase the effectiveness of the activities of medical institutions to high-quality medical care to the population in accordance with modern requirements and standards ko'to rsat ta'minlash in order O'the republic of uzbekistan, R2011, the president of espublika 28 years in November, "the real'liqni storage system deepening reform measures to'g'rising" accepted the decision⁴².

"So'g'stage of the storage system further upgrades more" (2011-2015) in the fifth stage called reform of the population, especially in rural areas high-quality primary medical-sanitary assistance ko'rsat opportunities that the units for'wide to minlash in the area of the event o'rin was separated. In particular, in accordance with the decision of the president of the republic in the year 2012-2015 healthy'liqni further enhancement of the storage system to reform either principal'is marked nalish⁴³. Safely'in the development of some liqni storage system either'toe the creation of international legal norms is also important nalish'ldi.

For this reason, adopted on 26 August 2015, the year the new edition of "the population of sanitary-epidemiological harmony'g'rising"o'will eliminate the above shortcomings in the law of the republic of uzbekistan. In particular, article 3 of this law of the population in sanitary-epidemiological harmony, state sanitary control, a man's living environment, sanitary-hygiene measures and measures against the epidemic, the sanitary-epidemiological situation, sanitary-epidemiological service, restrictive measures (quarantine), infectious va was given to review the basic concepts of diseases like parazitlar. At the same time, the population of this law, the sanitary-epidemiological state policy in the field of either the main harmony'of nalish (article 4), O'of the population of the republic of uzbekistan, the cabinet of ministers of uzbekistan sanitary-epidemiological competence in the field of harmony (article 6), the population of local authorities, sanitary-epidemiological competence in the field of harmony (article 7). The implementation of the obligations of the state sanitary control

⁴¹ Ўзбекистон Республикаси қонун ҳужжатлари тўплами, 2007. № 40.

⁴³ Ўзбекистон Республикаси Президентининг Қарори «Соғлиқни сақлаш тизимини ислох қилиши ва Буқурлаштириш чора-тадбирлари тўғрисида» // Sog'liqni saqlashni tashkil etish va boshqarish, 2011. 12-сон Б. 38

authorities (article 13) and others, such as new rules and requirements⁴⁴ reflected in found⁴⁴.

The units of the population with medicines there were also some shortcomings regarding the abovementioned legislation in health care. In 1997 of the republic of Uzbekistan adopted on 25 April in the year of, “drugs and the pharmaceutical activity’s rising” medicines and pharmaceutical activities in the field of competence of the local authorities in law, ethics, and examination of drug activity, either not reflected in it was not found. At the same time, the state pharmacopeya short tariff was given. This and due to other factors in the new edition of the year 2015 “drugs and pharmaceutical activity’s rising” ordinance adopted the law of the republic of Uzbekistan. In contrast to this law ordinance will eliminate the existing shortcomings. In particular, local authorities medicines and pharmaceutical activities in the field of competence (article 7), ethics examination⁴⁵ (article 11) and farmatsevtika either activity of it (article 15) were identified and clearly “the state of pharmacopeya⁴⁶” has units wide tariff was⁴⁷. In addition, the 2013 of the year 23 adopted on September, “which produced the disease in human immunodeficiency virus (hiv infection) against the spread of fight’s rising” ordinance gaps in the law of the republic of Uzbekistan on the basis of modern requirements was updated in the previous ones⁴⁸.

This, together with the healthy life the organizational structure of the storage area also was the update of the work in a suitable manner with the requirements of the times. In particular, 24 February 2016 at the same time in neighboring countries made at the same time, the president of neighboring countries to help to the republic of Uzbekistan “of the population health and layer of medical care the improvement of the social system’s organizational measures to citizens’ rising” on the basis of the decision ordinance of Uzbekistan Republic president of the personal 200 in a manner of the zgarib in the same time, neighboring countries made of PP-appropriate methodology dated to 700’shuncha were included⁴⁹.

The president of the republic of Uzbekistan “on measures for the rapid improvement of emergency medical care system” on the decision in accordance with the emergency medical assistance in the republic has an important role in improving the service. 2017 has purchased units for specialized vehicles of the year 1269 in the ambulance service and the vehicles were able to fully cover the needs of specialized procedures of this area, the ambulance service while providing medicines and medical products increased by 2 times.⁵⁰

⁵⁰ O‘zbekiston Respublikasi Prezidentining Qarori, 25.01.2018 yildagi PQ-3494-son

In general, the 2018 year 2017 in the field of medicine from the state budget. ko compared to 40 percent'p the funds' has been allocated. Kko elas years, nearly 30 percent'p money' either''s planned to naltiribbrowsing has been identified. O'the republic of uzbekistan president of the year 2018 accepted "the state medical institutions and health'liqni the material to keep the employees of the managing authority rag'measures to strengthen batlantirish to'g'"rising finance⁵¹ news in the area for a more positive toe'ldi. According to him, the salary of the medical staff of the year 2018 from December 1 to 20 percent, from 15 percent the year again carried April 1 2019⁵².

O'of uzbekistan the republic of uzbekistan ShavkatMirziyoev headed of the year in 2018 t 9 healthy on November'liqni storage system, the development of quality medical services with the population of the territory of ta'minlash, medical institutions of the material-technical base, strengthening toe'citizens the results of the reforms carried out ko'to mark out important tasks in the future and the bag sits'the use of videoselektor yig'twisted o'- check-in of passengers. About this O'the president of uzbekistan republic of uzbekistan on the official internet page of the message given. State the head of all o'that improve quality of medical care zgarib the main purpose of this process is of great importance in people's lives that one'will kidlab. So'nggi held by the president in two years'liqni the toe of the storage area'50 citizens decrees, resolutions and ordinances, as well as the decisions and orders of the cabinet of ministers were received more than 70, 6 new scientific-practical medical center of the organization and the total number of them amounted to 16. More of our citizens in the territory branch for the purpose of convenience 10 business started. District and city hospitals in new specialized units 306 toe'1 and 200 thousand ambulance stations were established for education⁵³.

This area is a positive result a new law adopted to achieve them, and on the basis of reforms have continued. However, the achievements oftheworld's problems along with also the presence of O'201 of the president of uzbekistan republic of uzbekistanon December 7 years, 8 UP-5590-number "2019-2025 years O'of the republic of uzbekistan the healthy'liqni storage systemto the development of Konsepsitiyasi"at ko'and rsat o'built in the us⁵⁴.

Needless to say conclusion in place in the republic 's health system reform within the framework of the implementation of measures to the storage of medical aid to the population in terms of the formation of much of the modern system has achieved certain results. In particular, the o'in the period after moving to rural health clinics in urban and rural family polyclinics through the organization of primary medical-sanitary assistance provision system has been improved, and the population expanded the possibilities of the use of this service. Emergency medical care provided much of a

single centralized created a system in which citizens, in particular, in areas of high technology specialized medical care provider based republican scientific-practical medical centers of the network continue to improve.

Reproductive health of the population, motherhood and childhood protection of a national program on the number of targeted implemented. Children of hereditary and congenital diseases born with in order to prevent national and regional screening centers were established.

As a result, 1991-2017-years in the total death index 20 percent, the death of mothers and babies 3,1 times reduced. 4 the average life expectancy compared to the year 1995,6 years and continues up to today 73,7 increased year⁵⁵.

3 maternal death index,1 times, reduced to 21 than the birth of a baby living in one position reached 100 thousand, the death of the baby and manuals of 3.1 times, reduced to a 11.5 per 1000 persons living has established position than the birth of the baby. In children, most often occurring in the b vaccination and preventive measures against diseases ofthe cover with the level of 96-98 percent in strictly preserved.

To fight against infectious diseases on complex preventive, against the epidemic and sanitary-hygiene measures, the introduction of extremely dangerous infectious diseases (plague, cholera), polio, difteriya, babies qoqshol local origin of malaria, measles and full will allow you to protect arising from qizilcha. Wild strain of polio (2002), measles and qizilcha (2017), malaria (the year 2018) of the world health organization will receive certificates were not on⁵⁶.
